# flexible solutions and timely results we build networks from the Ground Up

### DEVELOPMENT AND MAINTENANCE

CROSSLAYER specializes in site acquisition, zoning/permitting. Our site acquisition professionals have local real estate knowledge to help efficiently choose sites, maintain personal relationships that can be leveraged in expediting lease negotiations, and provide timely, thorough communications on site options to clients. Our success is based on understanding our clients' business goals and objectives and tailoring our solutions to meet each client's specific needs.

### CONSTRUCTION SERVICES

CROSSLAYER Construction Services facilitates commercial and telecommunication construction projects with specific expertise in Wireless communication sites and their related network operations.

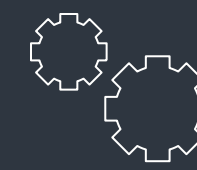

Our experienced professionals ensure quality, safety and dedication to wireless operators during deployment and system upgrades. Our team of construction professionals is always committed to meeting and exceeding the requirements for every site we work on and we apply our expertise to every project we manage.

### TECHNICAL OPERATIONS

CROSSLAYER has extensive experience in configuring and managing installation, commissioning decommissioning, maintenance and testing of equipment for Mobile and Landline communication networks. We have system engineers and field technicians available 24x7 to meet any type of network outage or service delivery need. We can provide a total solution from initial scope development and implementation through optimization and maintenance.

Our construction managers have extensive industry expertise in the construction and management of many types of facilities and related network elements. They manage new site construction, switching facilities, existing site expansion projects and site maintenance as individual services or on a turnkey basis.

**CONSULTING SERVICES**  
CROSSLAYER provides High Tech Solutions, 24x7 Technical Support, Network Management and Consulting for any size business. We are dedicated to finding cost effective and eco friendly solutions to business needs.

**SITE DEVELOPMENT**  
With CROSSLAYER your site development project will be professionally managed and completed to your specifications. We have professional teams in place with years of project management experience so your company will not have to hire and train a qualified site development staff.

**TECHNICAL OPERATIONS**  
CROSSLAYER Network Management solutions enable you to simplify complexity by automatically adapting to change, supporting process initiatives and prioritizing based on business impact. As you extend IP infrastructure investments and expand IP based services consider CROSSLAYER to manage your network.

**CONSTRUCTION SERVICES**  
Our professional team approach will analyze and seamlessly integrate all aspects of the construction process. Our construction staff is guided by our client's goals and objectives allowing us to assimilate within our client's culture which we effectively communicate to our subcontractor and team members.
